

Question	Supporting Information	London Plan Policy	Why are we asking for this information
SITE INFORMATION			
<p>Title number(s) Please add the title number(s) for the existing buildings(s) on the site. If the site has no title numbers, please enter "Unregistered"</p>	<p>Title number: If you do not know it, you can find the title number from HM Land Registry. All registered properties in the UK have a unique Title Number allocated by the Land Registry. This identifies the property and distinguishes it from others with similar addresses.</p>	None	Ownership and models of ownership are addressed through planning policy, in particular around affordable housing requirements.
<p>Energy Performance Certificate</p> <p>Do any of the buildings on the application site have an Energy Performance Certificate (EPC)?</p> <p>Please enter the reference number from the most recent Energy Performance Certificate (e.g. 1234-1234-1234-1234)</p>	<p>Please enter the 24-digit Energy Performance Certificate (EPC) number. If you do not know it, you can find the EPC number from the Ministry of Housing Communities and Local Government.</p>	<p>London Plan Objective GG6 Increasing efficiency and resilience.</p>	<p>The energy requirements of new developments are core to how the planning system is being used to address climate change.</p> <p>Information contained in the EPC provides baseline data to enable analysis of change.</p>
Public/Private Ownership			

What is the current ownership status of the site?

[Please select either public, private or mixed ownership. Find out the ownership status from the Mayor's map of publicly owned land.](#)

[London Plan Policy H5 Threshold Approach to Applications and Policy H4 Delivering Affordable housing](#)

Ownership and models of ownership are addressed through planning policy, in particular around affordable housing requirements.

INFORMATION ABOUT THE PROPOSED DEVELOPMENT

Householder

Please enter the amount of additional floorspace that the proposal will add to the property, in square metres.

What is the Gross Internal Area (in square metres) to be added by the development?

Gross Internal Area (GIA) is the area of a building measured to the internal face of the perimeter wall at each floor level. It differs from Net Internal Area (NIA) which is the useable area within a building measured to the internal face of the perimeter walls at each floor level with certain specified areas excluded.

Cross Cutting

Data split down by uses is core to the ability to monitor change across London. The monitoring of change informs both the review of the effectiveness of planning policy, but also its application to the consideration of development proposals.

Number of additional bedrooms proposed

Please enter the number of additional bedrooms the proposal will add to the property. If no additional bedrooms are proposed, please leave as zero.

None

In addition to this it also informs the need for current and future infrastructure provision.

Number of additional bathrooms proposed

Please enter the number of additional bathrooms the proposal will add to the property. If no additional bathrooms are proposed, please leave as zero.

None

FURTHER INFORMATION

Fast Track Application

Are the proposals eligible for the 'Fast Track Route' based on the affordable housing threshold and other criteria?

Please select 'Yes' if you are applying via the Fast Track Route. If your application does not meet the relevant affordable housing threshold or other relevant criteria, please select 'No'.

[London Plan Policy H5 Threshold Approach to Applications](#)

The Mayor's new London Plan introduces a threshold approach for major development proposals which trigger affordable housing requirements. The threshold is a minimum of 35% and 50% for major development on public land or where industrial capacity is lost.

Sub division of building

Do the proposals relate to the whole building?

Data split down by uses is core to the ability to monitor change across London. The monitoring of change informs both the review of the effectiveness of planning policy, but also its application to the consideration of development proposals.

Where proposals only affect part(s) of building(s), please provide details (e.g. 'Rear Ground Floor', 'Unit 1 - 1st-3rd Floor')

If the proposal only relates to part of a building, please provide details. This will assist the Local Authority officers in reviewing your application and improve monitoring. None

In addition to this it also informs the need for current and future infrastructure provision

Lead Registered Social Landlord (RSL)

If the proposal includes affordable housing has a Registered Social Landlord been confirmed?

[To access a full list of organisations operating in England please visit gov.uk.](#) None

The delivery of affordable housing is core to the consideration of planning applications.

Please provide the organisation name of the current lead RSL

This enables decisions to be made about the potential funding requirements and models of affordable housing delivery that may be available on any particular site.

Details of building(s)

Please add the details of each new separate building(s) being proposed. Please include any existing building(s) if they are increasing in height as part of the proposal.

Reference – please enter a reference for each building. The reference can be a numeric or character value e.g. 1, 2, 3 or A, B, C.

Maximum height (metres) – please enter the maximum proposed height of each building proposed in metres.

Number of storeys – Please enter the number of storeys for each building proposed. A storey is any level above ground so please do not include any basements or lower ground floor levels.

[London Plan Policy D9 Tall buildings](#)

Data split down by uses is core to the ability to monitor change across London. The monitoring of change informs both the review of the effectiveness of planning policy, but also its application to the consideration of development proposals.

In addition to this it also informs the need for current and future infrastructure provision.

Loss of garden land

Will the proposal result in the loss of any residential garden land?

If the proposal is being delivered on former residential garden land please tick yes.

[London Plan Policy H2 Small sites](#)

The Mayor's new London Plan supports well designed homes on small sites provided by small and medium sized housebuilders. Data on garden land developments will enable us to monitor small developments whilst also monitoring the loss of garden land.

Projected cost of works

Please provide the estimated total cost of the proposal

Please select one of the drop-down options; up to £2m; between £2m & £100m; or over £100m.

Please note that this information will be exclusively used for monitoring and infrastructure planning purposes only. It will not affect the planning process.

None

Identifying the approximate cost of the development will assist with infrastructure and utility planning as well as inform decisions on whether existing infrastructure is capable both individually and cumulatively to cater for additional demand.

PARKING

Vehicle Parking

Does the site have any existing vehicle/cycle parking spaces and will the proposed development add/remove parking spaces?

Please provide the number of existing and proposed parking spaces. Please note that car and disabled persons parking should be recorded separately unless its residential off-street parking which should include both.

Please complete the table for all existing and proposed vehicle parking, including the number of disabled persons parking bays to be provided.

[London Plan Policies T5 Cycling, T6.1 to T6.5 Parking](#)

Data split down by uses is core to the ability to monitor change across London. The monitoring of change informs both the review of the effectiveness of planning policy, but also its application to the consideration of development proposals.

VACANT BUILDING CREDIT

Vacant Building Credit

Does the proposed development qualify for the vacant building credit?

If the proposed development qualifies for vacant building credit (VBC), please answer 'Yes'.

[Find out more about vacant building credit from the Planning Practice Guidance.](#)

[London Plan Policy H5](#)

This is to enable a better understanding of the reuse of buildings and enable better infrastructure planning.

EXISTING AND PROPOSED

Existing and Proposed Uses

Please add details of the gross internal floor area (GIA) for all current uses and how this will change based on the proposed development. Details of the floor area for any proposed new uses should also added.

Gross Internal Area (GIA) is the area of a building measured to the internal face of the perimeter wall at each floor level. It differs from **Net Internal Area (NIA)** which is the useable area within a building measured to the internal face of the perimeter walls at each floor level with certain specified areas excluded.

Existing gross internal floor area – please list all existing uses on site whether they are affected by the proposal or not.

Gross internal floor area lost (including by change of use) – please list all floor area on site that is changing to a different use or being lost as part of the proposal.

Gross internal floor area gained (including by change of use) – please list all proposed floor area whether its new floor area or replacing an existing use.

[London Plan multiple policies](#)

Losses and gains of planning use classes can be monitored using floorspace, units or bedrooms or a combination of both.

This data will help us monitor the loss and gain of employment, industrial and residential floorspace amongst many other uses. It also allows us to closely monitor the loss of London’s important employment floorspace through permitted development and enable decisions to be made about cumulative impacts of development.

[Find out more about use classes here.](#)

SUPERSEDED CONSENTS

Superseded consents

Does this proposal supersede any existing consent(s)?

If this application is to replace or amend an existing consent, please select ‘Yes’. If no other consent applies to the application site, please select ‘No’.

None

Please enter details of any superseded consent(s)

Please note superseding is a monitoring term only and any existing consent will remain live until the lapsed date specified in the decision notice has passed.

This provides a better understanding of what is in the mind of the applicant, and ensure consideration is given to the availability of infrastructure in the correct quantum.

DEVELOPMENT DATES

<p>When are the building works expected to commence?</p>	<p>Commencement – developments are deemed to have commenced when</p> <ol style="list-style-type: none"> 1. the site has been demolished and demolition is part of the proposal 2. when groundworks have commenced 3. a start notice has been issued <p>Please note that this information will be exclusively used for monitoring and infrastructure planning purposes only. It will not affect the planning process.</p>	<p>None</p>	<p><u>This information will be used to aid utility and infrastructure planning and also to highlight which developments might have commenced or completed to improve efficiency when preparing statutory government returns.</u></p>
<p>When are the building works expected to be complete?</p>	<p>Completion - developments are deemed complete when they are fit for occupation.</p> <p>Please note that this information will be exclusively used for monitoring and infrastructure planning purposes only. It will not affect the planning process.</p>		<p>Ability and timing of delivery in many cases are now becoming material to the consideration of development proposals.</p>

Please add the expected commencement and completion dates for all phases of the proposed development.

Please provide as much detail as possible in the table.

If the entire development is to be completed in a single phase, state in the 'Phase Detail' that it covers the 'Entire Development'.

Please note that this information will be exclusively used for monitoring and infrastructure planning purposes only. It will not affect the planning process.

[If your development is expected to be delivered in phases, please provide as much detail as possible. This information will be again used to aid utility and infrastructure planning and also to which developments might have commenced or completed to improve efficiency when preparing statutory government returns.](#)

[Ability and timing of delivery in many cases are now becoming material to the consideration of development proposals.](#)

SCHEME DEVELOPMENT INFORMATION

Scheme name

Does the scheme have a name?

If the proposed development has a name, please enter it here. This will ensure all applications for specific developments can be grouped together to enabling better research and monitoring.

None

This enables the identification of schemes and related information.

Developer Information

Has a lead developer been assigned?

If a lead developer has been appointed, please provide their full company name, state whether they are registered in the UK and provide their registered company number.

None

This enables the identification of schemes and related information.

Is the lead developer a registered company in the UK?

Please note that this information will be exclusively used for monitoring purposes only. It will not affect the planning process.

[If the lead developer is registered in the UK and you do not know the registration number, you can search the Companies House register for free.](#)

RESIDENTIAL UNITS

Residential units

Does this proposal involve the loss or replacement or addition of any self-contained residential units or student accommodation (including those being rebuilt)?

Please record all self-contained residential units, all student accommodation (contained and non self-contained) and communal space being lost, gained or rebuilt as part of the application.

A **self-contained unit** of accommodation is one which contains a cooking area, bathroom and toilet for the exclusive use of the household living within the unit. If the occupiers need to leave the unit to gain access to any one of these amenities, then that unit is not self-contained. Non-self-contained units should be entered on the Other Residential Accommodation form rather than here.

[London Plan policies D3, D6, D7, H4, H10, H13, H15 and H5, H6](#)

Data split down by uses is core to the ability to monitor change across London. The monitoring of change informs both the review of the effectiveness of planning policy, but also its application to the consideration of development proposals.

In addition to this it also informs the need for current and future infrastructure provision.

Unit Type - Please select your residential unit type from the list below. If there is not a suitable option please select Other and provide a description in the box that appears.

Terraced Home - A house annexed to another house on two sides forming part of a row of similar houses each with its own frontage to a public road.

Semi Detached Home - A dwelling attached to another building or dwelling by one common party wall. Often each house's layout is a mirror image of the other.

Detached - A detached house is a stand-alone residential structure that does not share outside walls with another house or building.

Flat Apartment Maisonette - A flat is a separate and self-contained dwelling constructed or adapted for use for residential purposes and forming part of a building from some other part of which it is divided horizontally. Flats have to be contained within a dwelling with at least two storeys. A maisonette is typically over two storeys.

[London Plan policies D3, D6, D7, H4, H10, H13, H15 and H5, H6](#)

Data split down by uses is core to the ability to monitor change across London. The monitoring of change informs both the review of the effectiveness of planning policy, but also its application to the consideration of development proposals.

In addition to this it also informs the need for current and future infrastructure provision.

Live Work Unit - living accommodation that accommodates work facilities

Cluster Flat - a collection of bedrooms arranged around a communal kitchen or dining area

Studio or (s/c) Bedsit - a flat containing one main room.

Co Living Unit - private bedrooms with shared facilities

HMO - A flat or house occupied by more than one household with 6 or less bedrooms. If your dwelling has more than 6 bedrooms it is not a HMO and should be recorded as a hostel on the Other Residential Accommodation form.

Student Accommodation - purpose built student accommodation

Other

[London Plan policies D3, D6, D7, H4, H10, H13, H15 and H5, H6](#)

Data split down by uses is core to the ability to monitor change across London. The monitoring of change informs both the review of the effectiveness of planning policy, but also its application to the consideration of development proposals.

In addition to this it also informs the need for current and future infrastructure provision.

Please provide details for each separate type and specification of residential unit being provided.

Habitable room - is one which is intended to be used for living, sleeping, cooking or eating purposes. Please note that bathrooms, laundries, foyers, corridors etc. are not considered to be habitable rooms.

Bedrooms – Please do not sum up the bedroom numbers i.e. if you are building 10 two-bedroom flats please enter the number of bedrooms as 20 rather than 20.

Older persons housing - A self-contained unit specifically designed for older persons.

Sheltered Accommodation - A self-contained unit including specifically designed services such as an alarm system, laundry services, communal facilities or a warden on site. These units can be for specific vulnerable groups (older persons should be recorded separately as Older Persons Housing) or more general needs.

[London Plan policies D3, D6, D7, H4, H10, H13, H15 and H5, H6](#)

Data split down by uses is core to the ability to monitor change across London. The monitoring of change informs both the review of the effectiveness of planning policy, but also its application to the consideration of development proposals.

In addition to this it also informs the need for current and future infrastructure provision.

M4 compliance - the 2010 Building Regulations provide three categories of dwelling accessibility;

M4(1) - Visitable dwellings

M4(2) - Accessible and adaptable dwellings

M4(3)(2a) - Wheelchair adaptable

M4(3)(2b) - Wheelchair accessible

The Mayor's London Plan requires residential developments in Greater London to provide:

- 1) at least 10 per cent of dwellings (which are created via works to which Part M volume 1 of the Building Regulations applies) meet Building Regulation requirement M4(3) 'wheelchair user dwellings'
- 2) all other dwellings (which are created via works to which Part M volume 1 of the Building Regulations applies) meet Building Regulation requirement M4(2) 'accessible and adaptable dwellings'.

[London Plan policies D3, D6, D7, H4, H10, H13, H15 and H5, H6](#)

Data split down by uses is core to the ability to monitor change across London. The monitoring of change informs both the review of the effectiveness of planning policy, but also its application to the consideration of development proposals.

In addition to this it also informs the need for current and future infrastructure provision.

Please provide details for each separate type and specification of residential unit being lost/provided.

Garden Land - If the proposal involves the addition of new units please indicate if they are being built on residential garden land. Please ignore this question in the residential loss table. This question was included in error and should only appear in the residential gain table.

Communal space - Please add the number and size of units of communal space in the development. If your proposal does not include communal space please ignore.

Tenure - describes the financial arrangement of the occupancy of a self-contained residential unit. A list of the Mayor's preferred tenures are provided in paragraphs 4.6.3 to 4.6.6 of the London Plan.

Gross Internal Area (GIA) - the area of a building measured to the internal face of the perimeter wall at each floor level. It differs from Net Internal Area (NIA) which is the useable area within a building measured to the internal face of the perimeter walls at each floor level with certain specified areas excluded. Please enter the GIA for each specification of unit. Please do not sum the GIA.

[London Plan policies D3, D6, D7, H4, H10, H13, H15 and H5, H6](#)

Data split down by uses is core to the ability to monitor change across London. The monitoring of change informs both the review of the effectiveness of planning policy, but also its application to the consideration of development proposals.

In addition to this it also informs the need for current and future infrastructure provision.

WASTE RECYCLING

Waste and recycling provision

Does every unit in this proposal (residential and non-residential) have dedicated internal and external storage space for dry recycling, food waste and residual waste?

Please provide detail on the residential dwellings or non-residential uses which will not provide space for waste and recycling provision. If you do not yet know this, please enter a zero value but be aware that permission may not be granted without this information.

Additional information:

[London Plan Policy S17](#)

This information will be used to aid utility and infrastructure planning.

If no, please provide the details for every unit that does not meet the provision, indicating what is and isn't provided and the reason why all of these spaces cannot be provided

Best practice guidance

<https://resourcelondon.org/resources/toolkits/>

https://www.london.gov.uk/sites/default/files/57_waste_in_tall_buildings_2018.pdf

ELECTRIC VEHICLES

Electric vehicle charging points

If the proposed development will provide Electric Vehicle charging points and/ or hydrogen refuelling facilities, please provide detail in the table.

Please select the type of charging point and then indicate whether it will be active or psassive. Please use the Other option to record hydrogen refuelling facilities.

[London Plan Policy S17](#)

This information is required to demonstrate compliance with planning policy and enable infrastructure providers to be satisfied capacity exists. The data will also be used to monitor change in our city.

Do the proposals include electric vehicle charging points and/or hydrogen refuelling facilities?

Active charging points are fully installed and ready to use.

Passive charging points have electrical infrastructure/capacity in place to allow charging points to be installed.

ENVIRONMENT

Passive Cooling units

Number of residential units with passive cooling

Please enter zero. This question was added in error.

Emissions

Please provide the proposals total annual nitrogen oxide (NOx) emissions (Kilograms)

Required for major developments only
This information will be available from the Air Quality Assessment.

[These figures relate to the Air Quality Neutral policy \(SI1 B 2 \(a\)\)](#)

Tackling the climate crisis is a central objective of the planning system. Providing this information will enable demonstration of compliance with planning policy and enable the monitoring of the impact of development taking place across the city

Please provide the proposals total annual particulate matter (PM) emissions (Kilograms)

[For more information on NOx and PM emissions please see the Sustainable Design and Construction SPG.](#)

Greenhouse gas emission reductions

Will the proposals on-site greenhouse gas emissions be reduced by a level exceeding that specified by Part L of The Building

Required for major developments only
For Major Developments if the proposed development will have a minimum of 35% greenhouse gas emission reductions over and above those set out in Part L of the Building Regulations 2013, please select yes.
[Statutory guidance on the conservation of fuel and power \(document L\) 2013.](#)

[London Plan Policy S12](#)

Tackling the climate crisis is a central objective of the planning system. Providing this information will enable demonstration of compliance with planning policy and enable the monitoring of the impact of development taking place across the city

Regulations?

[GLA Energy Planning Guidance](#)

Green Roof

If the proposal includes a green roof, please provide the area in square metres. Please provide the total amount of Green Roof that will be created by the proposal https://www.london.gov.uk/sites/default/files/2019_london_living_roofs_walls_report.pdf

[London Plan Policy H2A, G1, G5, S14 & S113](#)

Urban Greening Factor

The Urban Greening Factor for the development is calculated in the following way:

$$\frac{(\text{Factor A} \times \text{Area}) + (\text{Factor B} \times \text{Area}) + (\text{Factor C} \times \text{Area})}{\text{Total Site Area}}$$

The Urban Greening Factors are listed in London Plan table 8.2 Urban Greening Factors.

Example

An office development with a 600 sqm footprint on a site of 1,000 sqm including a green roof, 250 sqm car parking, 100 sqm open water and 50 sqm of amenity grassland would score the following; $(0.7 \times 600) + (0.0 \times 250) + (1 \times 100) + (0.4 \times 50) / 1000 = 0.54$

Please provide the Urban Greening Factor score The development in the example above exceeds the interim target score of 0.3 for a predominately commercial development under Part B of Policy G5

[London Plan Policy G5](#)

Tackling the climate crisis is a central objective of the planning system. Providing this information will enable demonstration of compliance with planning policy and enable the monitoring of the impact of development taking place across the city

Residential units with electrical heating

Please provide the number of proposed residential units with electrical heating Guidance to follow

Tackling the climate crisis is a central objective of the planning system. Providing this information will enable demonstration of compliance with planning policy and enable the monitoring of the impact of development taking place across the city

Reused/Recycled materials

Please provide the percentage of demolition/construction material to be reused/recycled

If relevant, please enter the percentage of excavation material that will be sent for recycling or other beneficial use. If you do not yet know this, please enter a zero value.

[London Plan Policy SI 2 & SI 7](#)

Tackling the climate crisis is a central objective of the planning system. Providing this information will enable demonstration of compliance with planning policy and enable the monitoring of the impact of development taking place across the city

UTILITIES

Water and gas connections

Please provide the number of new water and gas connections required

If you do not yet know this, please leave as zero.

[London Plan Policy SI5](#)

This information will be used to aid utility and infrastructure planning.

Fire safety

Is a fire suppression system proposed?

If the proposed development will contain fire suppression systems, please select 'Yes'.

[London Plan Policy D12](#)

This information will be used to aid utility and infrastructure planning as well as enabling monitoring of safety in the proposed buildings

Internet connections

Please enter the number of residential units to be served by a full fibre internet connection

Please enter the number of new homes or non-residential units that will be served by a full fibre internet connection. It is recommended that further information on digital connectivity is provided via a statement/proforma to support your application.

[London Plan Policy SI6](#)

This information will be used to aid utility and infrastructure planning.

[If you have any questions please contact the Connected London Team.](#)

Mobile networks

Has consultation with mobile network operators been carried out?

If you have consulted mobile network officers regarding your proposal, please select yes.

[London Plan Policy SI6](#)

This information will be used to aid utility and infrastructure planning.

NON-PERMANENT DWELLINGS

Non-permanent Dwellings

Please add details of any non-permanent dwellings (if used as main residence e.g. caravans, mobile homes, converted railway carriages, etc...), traveller pitches/plots or houseboat moorings that this proposal seeks to add or remove

Please add details of any non-permanent dwellings (if used as a main residence e.g. caravans, mobile homes, converted railway carriages, etc...), traveller pitches/plots or houseboat moorings that this proposal seeks to add or remove.

[London Plan Policy H14](#)

This information is required to demonstrate compliance with planning policy and enable infrastructure providers to be satisfied capacity exists. The data will also be used to monitor change in our city.

OTHER RESIDENTIAL ACCOMMODATION

Other Residential Accommodation

Please add details of any rooms, based on the categories in the dropdown menu, that this proposal seeks to add or remove.

If your application proposes a change to the number and type of non self-contained accommodation (including those being rebuilt), please enter details. All self-contained accommodation should be recorded on the Residential Units form

Examples of non self-contained accommodation:
Hostel bedrooms
Hotel bedrooms
Residential home bedrooms
Secure residential institutions

[London Plan Policy H12, H16](#)

This information is required to demonstrate compliance with planning policy and enable infrastructure providers to be satisfied capacity exists. The data will also be used to monitor change in our city.

WATER MANAGEMENT

Water Management

Percentage reduction of surface water discharge (for a 1 in 100-year rainfall event)	Please enter the percentage reduction in surface water discharge. This can be found within the Drainage Proforma and Drainage Strategy and should be part of the approach of aiming to achieve greenfield run-off rates and following the drainage hierarchy.	https://www.london.gov.uk/what-we-do/environment/climate-change/surface-water/london-sustainable-drainage-proforma London Plan Policy S113	Tackling the climate crisis is a central objective of the planning system. Providing this information will enable demonstration of compliance with planning policy and enable the monitoring of the impact of development taking place across the city
Are Green Sustainable Urban Drainage (SuDS) incorporated into the drainage design	If any green sustainable urban drainage systems have been incorporated in your proposal, please select yes. This can be found within the Drainage Strategy and/or Drainage Proforma form. If you do not have one please select no.	Please click here to order your free copy of the SuDS manual https://www.ciria.org/ItemDetail?iProductCode=C753F&Category=F REEPUBS London Plan Policy G1, G5 and S113	Tackling the climate crisis is a central objective of the planning system. Providing this information will enable demonstration of compliance with planning policy and enable the monitoring of the impact of development taking place across the city
Please state the internal residential water usage (litres per person per day)	If residential units are part of your proposal, please enter the targeted water consumption (litres per person, per day). This figure can be found in your Sustainability Statement. If you do not have one, please enter zero.	London Plan Policy S115	Tackling the climate crisis is a central objective of the planning system. Providing this information will enable demonstration of compliance with planning policy and enable the monitoring of the impact of development taking place across the city
Is rain water harvested?	If your proposal includes plans to harvest rainwater, please select 'Yes'.	London Plan Policy S15 and S113	Tackling the climate crisis is a central objective of the planning system. Providing this information will enable demonstration of compliance with planning policy and enable the monitoring of the impact of development taking place across the city

If your proposal includes plans to reuse grey water, please select 'Yes'.

Grey water is the relatively clean wastewater from baths, sinks, washing machines, and other kitchen appliances. It can be reused onsite for toilet flushing, landscaping and irrigation purposes.

[London Plan Policy S15, S113](#)

Tackling the climate crisis is a central objective of the planning system. Providing this information will enable demonstration of compliance with planning policy and enable the monitoring of the impact of development taking place across the city

Is grey water reused?

Open Space

Open and Protected Space

Does the development result in the loss, gain or change of use of any open space? Please provide detail of any open space that will be lost, gained or changed as part of this proposal.

Please 'Add' details of any open space that is being lost, gained or having its use changed using the button below. You will need to complete all the fields in the popup box.

Open space is defined as all land that is predominantly undeveloped other than by buildings or structures that are ancillary to the open space use and applies to a broad range of types of open space, whether in public or private ownership and whether public access is unrestricted, limited or restricted.

The definition also covers areas of water such as rivers, canals, lakes and reservoirs which offer important opportunities for sport and recreation and can also act as a visual amenity.

This information is required to demonstrate compliance with planning policy . The data will also be used to monitor change in our city.

[Please visit the Mayor's Planning Data Map to look for areas of Open Space and their designations.](#) [London Plan Policy G1-9](#)

Nature Conservation

Does the development result in the loss, gain or change of use of a site protected with a nature designation?

Please add details of any if any of the following designations will be affected by the proposal:

- Site of Special Scientific Interest (SSSI)
- Site of Metropolitan Importance
- Site of Borough Grade 1 Importance
- Site of Borough Grade 2 Importance
- Site of Local Importance

Please 'Add' details of any protected space that is being lost, gained or having its use changed using the button below. You will need to complete all the fields in the popup box.

[London Plan Policy G6](#)

Tackling the climate crisis is a central objective of the planning system. Providing this information will enable demonstration of compliance with planning policy and enable the monitoring of the impact of development taking place across the city

[Please visit the Mayor's Planning Data Map to look for areas of Nature Conservation and their designations.](#)

Office Occupation

Please select the occupation status of the offices in question

Please select the most accurate occupation status for the existing offices on site:

- Vacant
- Partially Vacant
- Occupied

[London Plan Policy E1](#)

This information is required to demonstrate compliance with planning policy . The data will also be used to monitor change in our city.
