Key	Cells highlighted in pink indicate non-compliances.			Landing page
	Cells highlighted in tan indicate that the criteria are technically met with caveats or recommendations.			https://glastaging-gla.cs121.force.com/pr/s/
Level A Success Criteria				View screenshot
W3C Ref.	Level.		Principle 1: Perceivable - Information and user interface components must be presentable to users in ways they can perceive.	2 Level A Non-compliances 1 Level AA Non-compliance
1.1.1	A	Non-text Content	All non-text content that is presented to the user has a text alternative that serves the equivalent purpose.	PASS
1.2.1	A	Audio-only and Video-only (Pre-recorded)	For pre-recorded audio-only and pre-recorded video-only media, an alternative for time-based media or an audio track is provided that presents equivalent information.	N/A There is no pre-recorded audio-only and pre-recorded video-only media.
1.2.2	A	Captions (Pre-recorded)	Captions are provided for all pre-recorded audio content in synchronized media, except when the media is a media alternative for text and is clearly labelled as such.	N/A There is no synchronized media.
1.2.3	A	Audio Description or Media Alternative (Pre-recorded)	An alternative for time-based media or audio description of the pre-recorded video content is provided for synchronized media, except when the media is a media alternative for text and is clearly labelled as such.	N/A There is no time-based media or synchronized media.
1.3.1	A	Info and Relationships	Information, structure, and relationships conveyed through presentation can be programmatically determined or are available in text.	NON COMPLIANT

				<p>H1 in header area should be removed.</p> <p>Screen reader alternatives for “Mayor of London” and “London Assembly” are not present although sr-only spans are present in the HTML.</p> <p>Keyword search label for attribute does not match the input id.</p> <p>Input also lacks required attribute.</p>
1.3.2	A	Meaningful Sequence	When the sequence in which content is presented affects its meaning, a correct reading sequence can be programmatically determined.	PASS
1.3.3	A	Sensory Characteristics	Instructions provided for understanding and operating content do not rely solely on sensory characteristics of components such as shape, size, visual location, orientation, or sound.	PASS

1.4.1	A	Use of Colour	Colour is not used as the only visual means of conveying information, indicating an action, prompting a response, or distinguishing a visual element.	PASS
1.4.2	A	Audio Control	If any audio on a Web page plays automatically for more than 3 seconds, either a mechanism is available to pause or stop the audio, or a mechanism is available to control audio volume independently from the overall system volume level.	N/A There is no audio.
W3C Ref.	Level.		Principle 2: Operable - User interface components and navigation must be operable.	
2.1.1	A	Keyboard Navigation	All functionality of the content is operable through a keyboard interface without requiring specific timings for individual keystrokes, except where the underlying function requires input that depends on the path of the user's movement and not just the endpoints.	PASS
2.1.2	A	No Keyboard Trap	If keyboard focus can be moved to a component of the page using a keyboard interface, then focus can be moved away from that component using only a keyboard interface, and, if it requires more than unmodified arrow or tab keys or other standard exit methods, the user is advised of the method for moving focus away.	PASS
2.1.4	A	Character Key Shortcuts	If a keyboard shortcut is implemented in content using only letter (including upper- and lower-case letters), punctuation, number, or symbol characters, then at least one of the following is true: Turn off: A mechanism is available to turn the shortcut off; Remap: A mechanism is available to remap the shortcut to use one or more non-printable keyboard characters (e.g. Ctrl, Alt, etc); Active only on focus: The keyboard shortcut for a user interface component is only active when that component has focus.	N/A No keyboard shortcuts have been implemented.
2.2.1	A	Timing Adjustable	Provide users enough time to read and use content.	PASS
2.2.2	A	Pause, Stop, Hide	For moving, blinking, scrolling, or auto-updating information.	PASS

2.3.1	A	Three Flashes or Below Threshold	Web pages do not contain anything that flashes more than three times in any one second period, or the flash is below the general flash and red flash thresholds.	PASS
2.4.1	A	Bypass Blocks	A mechanism is available to bypass blocks of content that are repeated on multiple Web pages.	PASS with comments No mechanism present but also no content to bypass.
2.4.2	A	Page Titled	Web pages have titles that describe topic or purpose.	PASS
2.4.3	A	Focus Order	If a Web page can be navigated sequentially and the navigation sequences affect meaning or operation, focusable components receive focus in an order that preserves meaning and operability.	PASS
2.4.4	A	Link Purpose (In Context)	The purpose of each link can be determined from the link text alone or from the link text together with its programmatically determined link context, except where the purpose of the link would be ambiguous to users in general.	PASS
2.5.1	A	Pointer Gestures	All functionality that uses multipoint or path-based gestures for operation can be operated with a single pointer without a path-based gesture, unless a multipoint or path-based gesture is essential.	N/A There is no functionality that uses multipoint or path-based gestures.
2.5.2	A	Pointer Cancellation	For functionality that can be operated using a single pointer, at least one of the following is true: No Down-Event: The down-event of the pointer is not used to execute any part of the function; Abort or Undo: Completion of the function is on the up-event, and a mechanism is available to abort the function before completion or to undo the function after completion; Up Reversal: The up-event reverses any outcome of the preceding down-event; Essential: Completing the function on the down-event is essential.	PASS
2.5.3	A	Label in Name	For user interface components with labels that include text or images of text, the name contains the text that is presented visually.	PASS

2.5.4	A	Motion Actuation	<p>Functionality that can be operated by device motion or user motion can also be operated by user interface components and responding to the motion can be disabled to prevent accidental actuation, except when:</p> <p>Supported Interface: The motion is used to operate functionality through an accessibility supported interface;</p> <p>Essential: The motion is essential for the function and doing so would invalidate the activity.</p>	<p>N/A</p> <p>There is no functionality that can be operated by device motion or user motion.</p>
W3C Ref.	Level.		Principle 3: Understandable - Information and the operation of user interface must be understandable.	
3.1.1	A	Language of Page	The default human language of each Web page can be programmatically determined.	PASS
3.2.1	A	On Focus	When any component receives focus, it does not initiate a change of context.	PASS
3.2.2	A	On Input	Changing the setting of any user interface component does not automatically cause a change of context unless the user has been advised of the behaviour before using the component	PASS
3.3.1	A	Error Identification	If an input error is automatically detected, the item that is in error is identified and the error is described to the user in text.	<p>NON COMPLIANT</p> <p>Aria-describedby on Keyword Search input does not point to the error message.</p> <p>Input is not marked as invalid when an error is detected.</p>
3.3.2	A	Labels or Instructions	Labels or instructions are provided when content requires user input.	PASS

W3C Ref.	Level.		Guideline 4.1 Compatible: Maximize compatibility with current and future user agents, including assistive technologies.	
4.1.1	A	Parsing	In content implemented using mark-up languages, elements have complete start and end tags, elements are nested according to their specifications, elements do not contain duplicate attributes, and any IDs are unique, except where the specifications allow these features.	PASS
4.1.2	A	Name, Role, Value	For all user interface components (including but not limited to: form elements, links and components generated by scripts), the name and role can be programmatically determined; states, properties, and values that can be set by the user can be programmatically set; and notification of changes to these items is available to user agents, including assistive technologies.	PASS

Level AA Success Criteria

W3C Ref.	Level.		Principle 1: Perceivable - Information and user interface components must be presentable to users in ways they can perceive.	
1.2.4	AA	Captions	Captions are provided for all live audio content in synchronized media.	N/A There is no live synchronized media.
1.2.5	AA	Audio Description (Pre-recorded)	Audio description is provided for all pre-recorded video content in synchronized media.	N/A There is no synchronized media.
1.3.4	AA	Orientation	Content does not restrict its view and operation to a single display orientation, such as portrait or landscape, unless a specific display orientation is essential.	PASS

1.3.5	AA	Identify Input Purpose	<p>The purpose of each input field collecting information about the user can be programmatically determined when:</p> <p>The input field serves a purpose identified in the Input Purposes for User Interface Components section; and</p> <p>The content is implemented using technologies with support for identifying the expected meaning for form input data.</p>	PASS
1.4.3	AA	Colour Contrast	The visual presentation of text and images of text has a contrast ratio of at least 4.5:1	<p>NON COMPLIANT</p> <p>1 combination of foreground and background colours does not have sufficient contrast. Please see the Colour Contrast Analysis worksheet.</p>
1.4.4	AA	Resize Text	Except for captions and images of text, text can be resized without assistive technology up to 200 percent without loss of content or functionality.	PASS
1.4.5	AA	Images of Text	<p>If the technologies being used can achieve the visual presentation, text is used to convey information rather than images of text except for the following:</p> <p>Customizable: The image of text can be visually customized to the user's requirements;</p> <p>Essential: A particular presentation of text is essential to the information being conveyed.</p>	PASS
1.4.10	AA	Reflow	<p>Content can be presented without loss of information or functionality, and without requiring scrolling in two dimensions for:</p> <p>Vertical scrolling content at a width equivalent to 320 CSS pixels;</p> <p>Horizontal scrolling content at a height equivalent to 256 CSS pixels.</p> <p>Except for parts of the content which require two-dimensional layout for usage or meaning.</p>	PASS

1.4.11	AA	Non-text Contrast	<p>The visual presentation of the following have a contrast ratio of at least 3:1 against adjacent colour(s):</p> <p>User Interface Components: Visual information required to identify user interface components and states, except for inactive components or where the appearance of the component is determined by the user agent and not modified by the author;</p> <p>Graphical Objects: Parts of graphics required to understand the content, except when a particular presentation of graphics is essential to the information being conveyed.</p>	PASS
1.4.12	AA	Text Spacing	<p>In content implemented using mark-up languages that support the following text style properties, no loss of content or functionality occurs by setting all of the following and by changing no other style property:</p> <p>Line height (line spacing) to at least 1.5 times the font size;</p> <p>Spacing following paragraphs to at least 2 times the font size;</p> <p>Letter spacing (tracking) to at least 0.12 times the font size;</p> <p>Word spacing to at least 0.16 times the font size.</p> <p>Exception: Human languages and scripts that do not make use of one or more of these text style properties in written text can conform using only the properties that exist for that combination of language and script.</p>	PASS

1.4.13	AA	Content on Hover or Focus	<p>Where receiving and then removing pointer hover or keyboard focus triggers additional content to become visible and then hidden, the following are true:</p> <p>Dismissable: A mechanism is available to dismiss the additional content without moving pointer hover or keyboard focus, unless the additional content communicates an input error or does not obscure or replace other content;</p> <p>Hoverable: If pointer hover can trigger the additional content, then the pointer can be moved over the additional content without the additional content disappearing;</p> <p>Persistent: The additional content remains visible until the hover or focus trigger is removed, the user dismisses it, or its information is no longer valid.</p> <p>Exception: The visual presentation of the additional content is controlled by the user agent and is not modified by the author.</p>	PASS
W3C Ref.	Level.		Principle 2: Operable - User interface components and navigation must be operable.	
2.4.5	AA	Multiple Ways	More than one way is available to locate a Web page within a set of Web pages except where the Web Page is the result of, or a step in, a process.	PASS
2.4.6	AA	Headings and Labels	Headings and labels describe topic or purpose.	PASS
2.4.7	AA	Focus Visible	Any keyboard operable user interface has a mode of operation where the keyboard focus indicator is visible.	PASS
W3C Ref.	Level.		Principle 3: Understandable - Information and the operation of user interface must be understandable.	
3.1.2	AA	Language of Parts	The human language of each passage or phrase in the content can be programmatically determined except for proper names, technical terms, words of indeterminate language, and words or phrases that have become part of the vernacular of the immediately surrounding text.	N/A
				The human language does not change.

3.2.3	AA	Consistent Navigation	Navigational mechanisms that are repeated on multiple Web pages within a set of Web pages occur in the same relative order each time they are repeated, unless a change is initiated by the user.	PASS
3.2.4	AA	Consistent Identification	Components that have the same functionality within a set of Web pages are identified consistently.	PASS
3.3.3	AA	Error Suggestion	If an input error is automatically detected and suggestions for correction are known, then the suggestions are provided to the user, unless it would jeopardize the security or purpose of the content.	PASS
3.3.4	AA	Error Prevention (Legal, Financial, Data)	For Web pages that cause legal commitments or financial transactions for the user to occur, that modify or delete user-controllable data in data storage systems, or that submit user test responses, at least one of the following is true: Reversible, Checked, Confirmed.	N/A
W3C Ref.	Level.		Guideline 4.1 Compatible: Maximize compatibility with current and future user agents, including assistive technologies.	
4.1.3	AA	Status Messages	In content implemented using mark-up languages, status messages can be programmatically determined through role or properties such that they can be presented to the user by assistive technologies without receiving focus.	PASS

Level AAA Success Criteria

W3C Ref.	Level.		Principle 1: Perceivable - Information and user interface components must be presentable to users in ways they can perceive.	
1.2.6	AAA	Sign Language (Prerecorded)	Sign language interpretation is provided for all prerecorded audio content in synchronized media.	NOT TESTED

				<p>When testing for compliance with AA, leave all AAA results set to Not Tested.</p> <p>When testing for compliance with AAA, delete the Not Tested result setting from all 50 columns even if fewer than 50 are being tested.</p>
1.2.7	AAA	Extended Audio Description (Prerecorded)	Where pauses in foreground audio are insufficient to allow audio descriptions to convey the sense of the video, extended audio description is provided for all prerecorded video content in synchronized media.	NOT TESTED
1.2.8	AAA	Media Alternative (Prerecorded)	An alternative for time-based media is provided for all prerecorded synchronized media and for all prerecorded video-only media.	NOT TESTED
1.2.9	AAA	Audio-only (Live)	An alternative for time-based media that presents equivalent information for live audio-only content is provided.	NOT TESTED
1.3.6	AAA	Identify Purpose	In content implemented using markup languages, the purpose of User Interface Components, icons, and regions can be programmatically determined.	NOT TESTED
1.4.6	AAA	Contrast (Enhanced)	<p>The visual presentation of text and images of text has a contrast ratio of at least 7:1, except for the following:</p> <p>Large Text: Large-scale text and images of large-scale text have a contrast ratio of at least 4.5:1;</p> <p>Incidental: Text or images of text that are part of an inactive user interface component, that are pure decoration, that are not visible to anyone, or that are part of a picture that contains significant other visual content, have no contrast requirement.</p> <p>Logotypes: Text that is part of a logo or brand name has no contrast requirement.</p>	NOT TESTED

1.4.7	AAA	Low or No Background Audio	<p>For prerecorded audio-only content that (1) contains primarily speech in the foreground, (2) is not an audio CAPTCHA or audio logo, and (3) is not vocalization intended to be primarily musical expression such as singing or rapping, at least one of the following is true:</p> <p>No Background: The audio does not contain background sounds. Turn Off: The background sounds can be turned off. 20 dB: The background sounds are at least 20 decibels lower than the foreground speech content, with the exception of occasional sounds that last for only one or two seconds.</p>	NOT TESTED
1.4.8	AAA	Visual Presentation	<p>For the visual presentation of blocks of text, a mechanism is available to achieve the following:</p> <p>a) Foreground and background colors can be selected by the user. b) Width is no more than 80 characters or glyphs (40 if CJK). c) Text is not justified (aligned to both the left and the right margins). d) Line spacing (leading) is at least space-and-a-half within paragraphs, and paragraph spacing is at least 1.5 times larger than the line spacing. e) Text can be resized without assistive technology up to 200 percent in a way that does not require the user to scroll horizontally to read a line of text on a full-screen window.</p>	NOT TESTED
1.4.9	AAA	Images of Text (No Exception)	<p>Images of text are only used for pure decoration or where a particular presentation of text is essential to the information being conveyed.</p>	NOT TESTED
2.1.3	AAA	Keyboard (No Exception)	<p>All functionality of the content is operable through a keyboard interface without requiring specific timings for individual keystrokes.</p>	NOT TESTED
2.2.3	AAA	No Timing	<p>Timing is not an essential part of the event or activity presented by the content, except for non-interactive synchronized media and real-time events.</p>	NOT TESTED
2.2.4	AAA	Interruptions	<p>Interruptions can be postponed or suppressed by the user, except interruptions involving an emergency.</p>	NOT TESTED
2.2.5	AAA	Re-authenticating	<p>When an authenticated session expires, the user can continue the activity without loss of data after re-authenticating.</p>	NOT TESTED

2.2.6	AAA	Timeouts	Users are warned of the duration of any user inactivity that could cause data loss, unless the data is preserved for more than 20 hours when the user does not take any actions.	NOT TESTED
2.3.2	AAA	Three Flashes	Web pages do not contain anything that flashes more than three times in any one second period.	NOT TESTED
2.3.3	AAA	Animation from Interactions	Motion animation triggered by interaction can be disabled, unless the animation is essential to the functionality or the information being conveyed.	NOT TESTED
2.4.8	AAA	Location	Information about the user's location within a set of Web pages is available.	NOT TESTED
2.4.9	AAA	Link Purpose (Link Only)	A mechanism is available to allow the purpose of each link to be identified from link text alone, except where the purpose of the link would be ambiguous to users in general.	NOT TESTED
2.4.10	AAA	Section Headings	Section headings are used to organize the content.	NOT TESTED
2.5.5	AAA	Target Size	<p>The size of the target for pointer inputs is at least 44 by 44 CSS pixels except when:</p> <p>Equivalent: The target is available through an equivalent link or control on the same page that is at least 44 by 44 CSS pixels;</p> <p>Inline: The target is in a sentence or block of text;</p> <p>User Agent Control: The size of the target is determined by the user agent and is not modified by the author;</p> <p>Essential: A particular presentation of the target is essential to the information being conveyed.</p>	NOT TESTED
2.5.6	AAA	Concurrent Input Mechanisms	Web content does not restrict use of input modalities available on a platform except where the restriction is essential, required to ensure the security of the content, or required to respect user settings.	NOT TESTED

3.1.3	AAA	Unusual Words	A mechanism is available for identifying specific definitions of words or phrases used in an unusual or restricted way, including idioms and jargon.	NOT TESTED
3.1.4	AAA	Abbreviations	A mechanism for identifying the expanded form or meaning of abbreviations is available.	NOT TESTED
3.1.5	AAA	Reading Level	When text requires reading ability more advanced than the lower secondary education level after removal of proper names and titles, supplemental content, or a version that does not require reading ability more advanced than the lower secondary education level, is available.	NOT TESTED
3.1.6	AAA	Pronunciation	A mechanism is available for identifying specific pronunciation of words where meaning of the words, in context, is ambiguous without knowing the pronunciation.	NOT TESTED
3.2.5	AAA	Change on Request	Changes of context are initiated only by user request or a mechanism is available to turn off such changes.	NOT TESTED
3.3.5	AAA	Help	Context-sensitive help is available.	NOT TESTED
3.3.6	AAA	Error Prevention (All)	<p>For Web pages that require the user to submit information, at least one of the following is true:</p> <p>Reversible: Submissions are reversible.</p> <p>Checked: Data entered by the user is checked for input errors and the user is provided an opportunity to correct them.</p> <p>Confirmed: A mechanism is available for reviewing, confirming, and correcting information before finalizing the submission.</p>	NOT TESTED

PASS
N/A There is no pre-recorded audio-only and pre-recorded video-only media.
N/A There is no synchronized media.
N/A There is no time-based media or synchronized media.
NON COMPLIANT

Labels are not associated with inputs. Add for attribute to label elements and match to associated input ID attribute.

Heading level has been skipped, "Leave a comment" is an H3 where it should be an H2.

The expand/collapse button for the form is inappropriately named "Settings". The name should be changed to represent its function.

The button should also utilise the aria-expanded attribute to convey the current state to screen reader users.
