Local Government Digital Service Standard Review

Common approach to deliver
good quality, user centred, value
for money, digital services.

Local Government Digital Service Standard

Local Government Digital Service Standard

The Local Government Digital Service Standard suggests a 15 point common approach for local authorities to deliver good quality, user centred, value for money, digital services.

1. Understand user needs

Research to develop deep knowledge of who the service users are and what that means for the design of the service.

[Read more about point 1](#)

2. Have a multidisciplinary team

Ensure a suitably skilled, sustainable multidisciplinary team, led by a senior service manager with decision making responsibility, can design, build and improve the service.

[Read more about point 2](#)

3. Use agile methods

Create a service using the agile, iterative and user-centred methods set out in the Government Service Design Manual.

Assessment Conclusion

Significant achievement in opening up London's data and increasing transparency.

Difficult to continuously improve the service to meet user needs, due to:

- Limited resource
- Platform limitations

If the service is to fulfil its potential, investment in both is required

Datastore Team

- **Product Manager**
- **Content Manager** – responsible for over 200 datasets

Work closely with...

- **GIS & Infrastructure Manager** – technical development and wider infrastructure
- **Datapress** – SaaS (includes hosting, dev & ad-hoc support)

Discovery – September 2019

Will inform vision for next iteration of Datastore

Will identify resources required to deliver a solution

Discovery prep

Stakeholder mapping

- Internal/External
 - Data consumers/Data Publishers/Other stakeholders
 - Technical/Strategic users
 - Existing/Potential users
-

Your feedback

- What gaps or needs have you identified that Datastore could fill?
- Any suggestions on who to engage for discovery?

A New Deal for City Data

City Data Analytics Programme

MAYOR OF LONDON

Smarter London Together

Mission 1: More user-designed services

Mission 2: New Deal for City Data

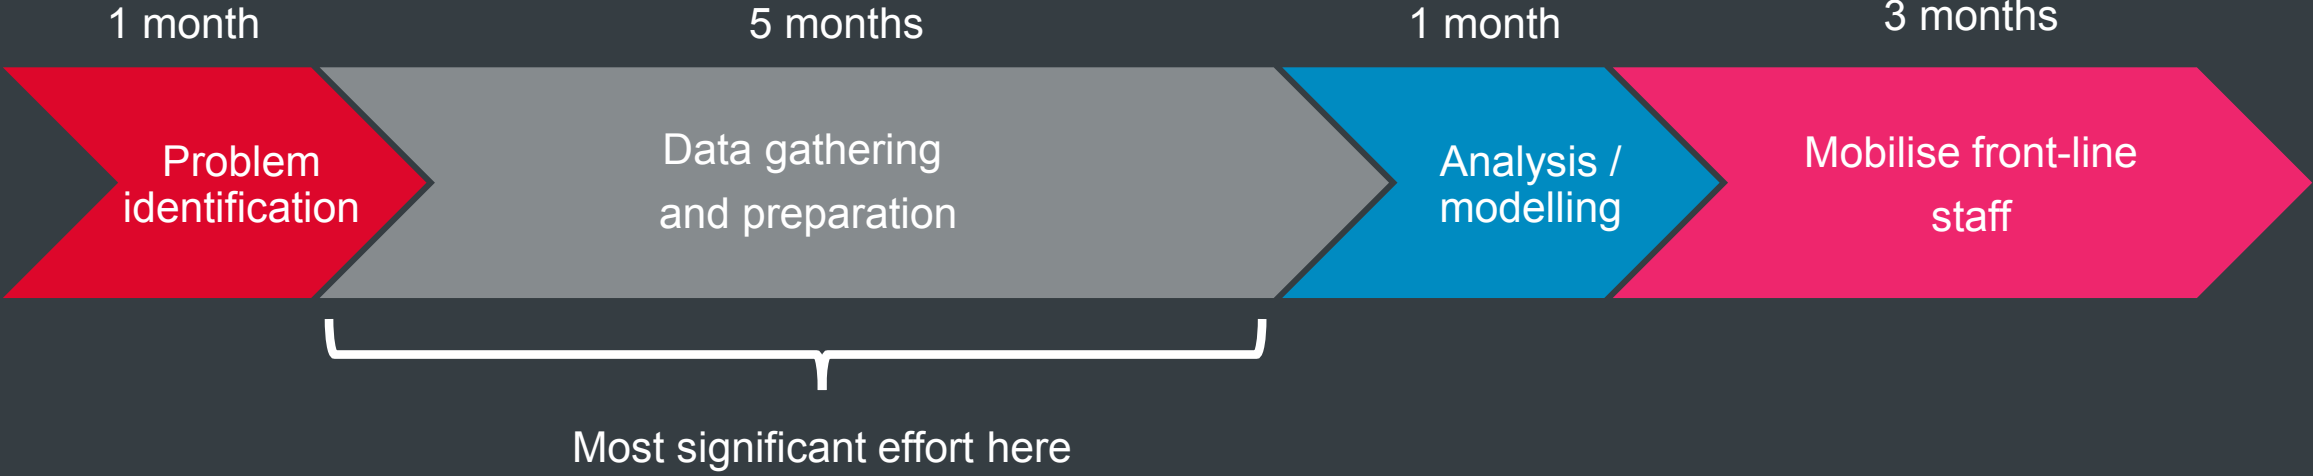

- City Data Analytics Programme

Mission 3: World-class connectivity and smarter streets

Mission 4: Enhance digital leadership and skills

Mission 5: Improve city-wide collaboration
