Density [M39]

Agenda

Panel's Opening Announcements

M39. Would Policy D6 on optimising density be effective in achieving the intentions in Policy GG2 on making the best use of land and is the policy approach justified especially bearing in mind the cumulative impact on the environment and infrastructure? In particular:

- a) Will leaving density to be assessed on a site-by-site basis compared to the matrix in The London Plan of 2011 be effective?
- b) Would the provisions of Policy D6 provide an effective strategic context for the preparation of local plans and neighbourhood plans?
- c) Would the detailed criteria provide an effective and justified basis for development management, are they all necessary and do they provide sufficient clarity about how competing considerations are to be reconciled by the decision-maker?
