Aggregates and Hydraulic Fracturing [M70 -M71]

Agenda

Panel's Opening Announcements

M70. Aggregates

Would Policy SI10 provide a justified and effective strategic framework for the steady and adequate supply of aggregates to support construction in London? In particular:

- a) What is the justification for the landbank apportionments in the four boroughs identified? Would the approach taken be effective in ensuring an adequate supply of aggregates to meet the level of growth envisaged?
- b) In the absence of a target for reuse/recycling of construction, demolition and excavation waste as aggregate, would the policy be effective?
- c) Would the approach taken to safeguarding resources and facilities, as set out in SI10C, be effective in ensuring the steady and adequate supply of aggregates to support construction in London?
- d) Would Policy SI10 adequately address the full range of environmental and other impacts of aggregate facilities?

M71. Hydraulic Fracturing

M71. Would Policy SI11 be consistent with national policy¹ in respect of the exploration, appraisal or production of shale gas via hydraulic fracturing? If not, what is the justification for the approach taken?

Panel's Closing Remarks

¹ National policy as set out in the NPPF PPG Minerals and the WMS Planning for Onshore Oil and Gas: Written Statement (16 September 2015) and Energy Policy: Written statement (17 May 2018)
