

Hi Charlotte

Apologies for the delay, but I can confirm that our comments still stand, but we don't feel the need to expand upon them by way of a Hearing.

Please can you update the details for [REDACTED] and replace with [REDACTED] (cc'd) and me.

Thanks
Ian

Iceni Projects at COP26: Lets Go Zero

We are all on a journey to be carbon zero by 2030. Cycling the 433 miles from London to Glasgow for COP26 gives us the chance to shine a light on Lets Go Zero's campaign to empower schools and their pupils to stand up for change, and to ask this generation to improve the chances of the next. If you'd like to know more about their campaign, click here, and equally, if you'd like to provide financial support, you can do so here.

The banner features logos for 'London to Glasgow', 'iceni', and 'COP26' on the left, and the 'LET'S GO ZERO 2030' logo in the center. The background is dark with a faint map of the UK.
